Features and Benefits:

Power-Flo Burners

Motorised Rotisserie

Pyrolytic Cleaning

Hot Surface Ignition

Quality Stainless Steel

Infrared Grill

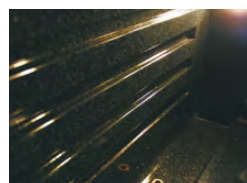

Flex-Roll Oven Racks

Cool Touch Door

Stay-Cool Knobs

Durable Oven Interior

Warranty	2 Years
Multi Function Oven	Bake, Broil, Convection Bake, Convection Broil, Open-Door Broil, Infrared-Grill, Warm, Slow Cooking, Defrost, Preheat, Normal Thawing, Advanced Thawing, Rotisserie, Convection Rotisserie & Self-Clean.
Barbecue Grill Plate (AGSCR484QT N/L Model Only)	Infra-Q ceramic barbecue grill burner with solid stainless steel channelled grates making it an excellent heat conductor, efficiently reaching 500°C.
Teppanyaki Grill Plate (AGSCR484QT, AGSCR486T & AGSCR484T N/L Models Only)	Made of restaurant quality 10mm thick non-rusting stainless steel, making it extremely durable and helping to maintain temperatures for longer.
Quality Stainless Steel Product	Every Capital appliance is engineered and then handcrafted using 304 grade stainless steel by a dedicated team of industry professionals.
Titanium Speck Porcelain Oven Interior	Durable, high quality oven interior which is very resistant to high temperatures.
40-Watt Bright Oven Lights	Powerful light allows you to accurately observe the progress of your cooking, reducing how often you open the door and reducing heat loss.
Gas Type	Choice of Natural or LPG
Handcrafted with Precision in California	Units are designed and handcrafted in California, U.S.A. by dedicated boutique specialist manufacturer.

48" Upright Cooker Precision Range

20Mj/hr Power-Flo Burners

The most advanced custom designed burners in the industry, from true simmering to an incredibly powerful 20Mj/hr. The burners have auto re-ignition and are designed to distribute heat evenly.

Motorised Rotisserie System

Allows you to roast mouth-watering, evenly cooked meals at up to 290°C. Rotisserie spit rod and prongs are made of heavy duty stainless steel and are built to last and easy to clean.

Pyrolytic Cleaning System

During this unique cleaning process the oven door is locked and the interior is superheated to 500°C. The powerful 31Mj/hr gas fired oven turns food spoils into ash which can be easily wiped away with a damp sponge making cleaning a breeze.

Hot Surface Ignition

Electronic thermostat is used to monitor the oven temperature so that the burner turns off when the oven reaches the desired temperature. This is a very accurate and efficient system.

Infra-Q BBQ/Teppanyaki Grill Plate

Powerful Infra-Q ceramic tile burner that can produce temperatures in excess of 500°C for quick, efficient searing.

Note: Only available on selected models

Infrared Grill

Capital ovens have a high temperature infrared grill behind clear ceramic glass. This provides even heat distribution while eliminating flare ups during the grilling process and producing precise temperatures in rapid time.

Flex-Roll Oven Racks

Chrome plated Flex-Roll oven racks provide a smooth, effortless range of motion to easily check and access your meals. The racks are easily removed for the pyrolytic cleaning process.

Cool Touch Oven Door

Large viewing window is cool to the touch during cooking and is seamlessly integrated to make cleaning easy. Comes with a 30mm pro-style handle.

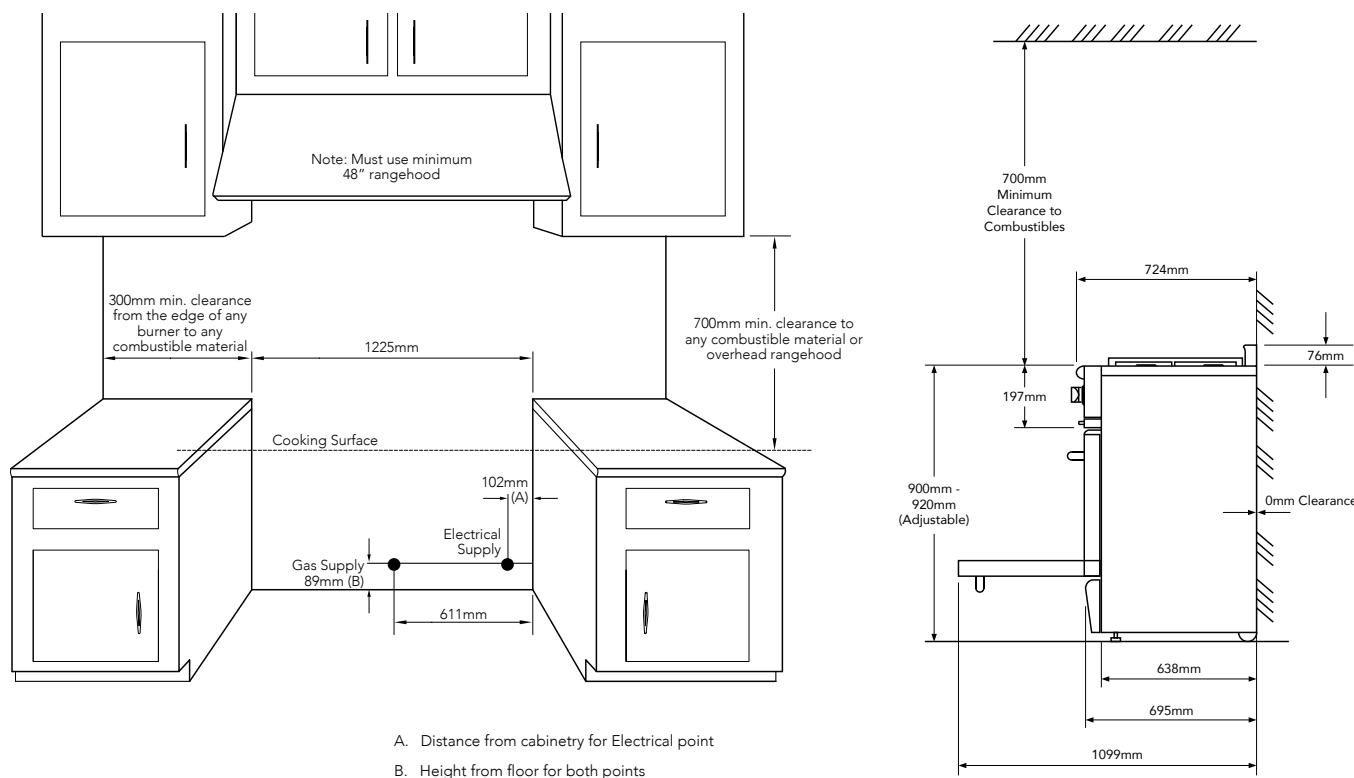

Stay-Cool Metal Knobs

Made of restaurant grade, die cast chrome plated metal with cool grip plastic inserts making them always cool to touch. Features bold graphics for easy to read settings.
